All questions were evaluated separately for the cities with predominantly German speaking players[1] and the non-German speaking cities[2] (Pacifica, Port Niagara, World Village, Conestoga Creek, Katimavik Bay, Kolonistenpolder, Settler's Gate, and Duchy of Dragonwyck). The results displayed are arithmetic means of the respective cities.
In the case of questions already asked in the previous survey, the degree of change is indicated in brackets (depicted in the color of the corresponding segment if – for lack of space – it is difficult to discern which segment a bracketed value belongs to).

1 For lack of space, in the tables and diagrams these cities are referred to as "German Cities."
2 In the tables and diagrams, these cities are referred to as "International Cities."

The individual questions were evaluated separately for different parameters. The results were entered in tables and depicted as circle diagrams (arithmetic means of the German and international cities respectively). The following colors were used for the different rating categories:

	No opinion / I don't know this / Not specified / I don't participate
	I know it, but it doesn't interest me
	Very poor / Significant decline / Strong need for change
	Poor / Decline / Need for change / Unimportant
	Good / Interesting / Important / Improvement
	Very good / Very important / Significant improvement
	No difference

In the tables, the respective minimum and maximum values are bolded. In some of the circle diagrams, the corresponding question is abbreviated, and in some of the tables, certain answer options are also abbreviated, in which case the full text of the answer options appears above the table.

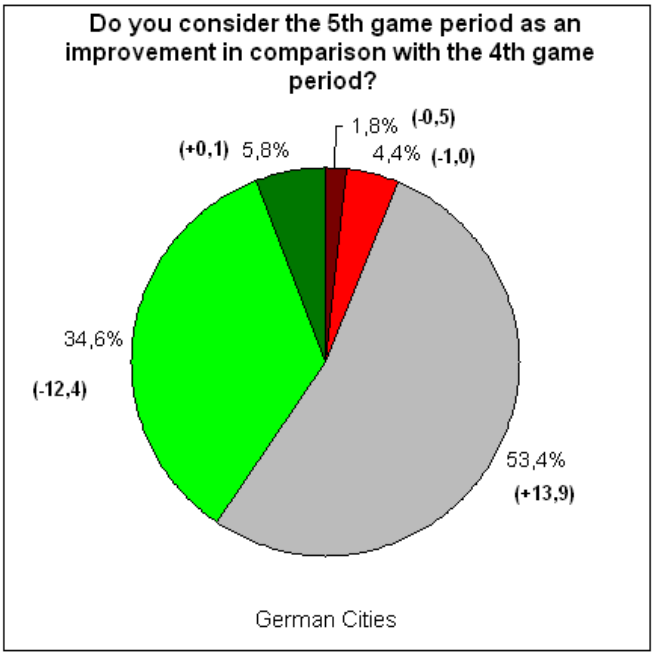
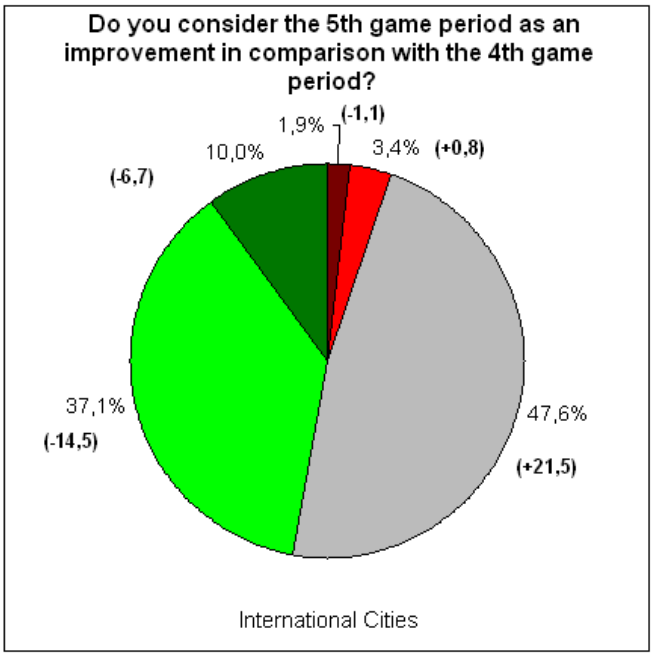
The bracketed values refer to the changes observed when comparing the results of this question to the results of the same question asked in our previous survey about the 5th vs. the 4th hame period.

Without considering the new answer option ("I can't tell because I wasn't present in the 4th game period") and the answer option "No opinion," the situation is as follows:





Question 10: What do you think of the current concept of having separate game periods that include the contest of the cities? (After 6 months, the game starts over and the titles are awarded.)

Cities	ZIP code	No opinion	I only play the games. The Metaworld doesn't interest me.	Having separate game periods bothers me, and so does the contest between the cities. Upgrading clothing and house would be enough.	I think separate game periods are OK, but I'm not really interested in the contest between the cities.	I like the separate game periods and actively participate in the contest between the cities.
